Career Summary:

Full Stack Developer with 4+ years of experience designing and deploying scalable web and desktop applications. Skilled in ASP.NET Core, C#, SQL Server, Vue.js, Tailwind CSS, and JavaScript, with proven expertise in building RESTful APIs, interactive admin dashboards, and optimized backend logic. Experienced across .NET, PHP, and hybrid mobile frameworks, with strong database management and testing using Entity Framework, LINQ, and xUnit..

Experienced in cross-platform and hybrid app development using Ionic, and also worked extensively with CMS platforms like WordPress, Shopify, and WooCommerce.

Strong background in quality control operations from Huawei, where I managed remote quality validation and telecom project coordination using enterprise tools like ISDP Smart QC, SIMspace, and project dashboards.

Technical SKILLS:

- ASP.NET
- Database Management & Optimization
- Git, GitHub, Azure Repos
- xUnit Testing
- CMS (WordPress)
- API Integration & Development
- Troubleshooting and Debugging
- Dataminer (Cube)
- Huawei ISDP Smart QC & SIMspace Tools
- Low Code App (CATA)
- Catalog Development
- Remote Collaboration
- Protocol Development
- Customer Experience

EDUCATION:

Bachelor of Science in Computer Science (BSCS)

Sept 2016- Aug 2020

University of Engineering and Technology Lahore, Punjab, Pakistan

WORK EXPERIENCE:

DigSolutions Provider Lahore, PAKISTAN

December 2024-Present

Full Stack Developer | Dot NET Developer

I was working as a Full Stack .NET Developer to develop web and desktop applications and Web APIs. I built scalable applications using ASP.NET Core, C#, and SQL Server, handling backend logic and API integrations, along with frontend development using Razor Pages, JavaScript, Vue.js 3, and HTML. I also designed and maintained modern admin dashboards with Tailwind CSS to enhance usability and performance.

Languages Platforms and Tools:

- C#, ASP.NET Core, and .NET 6/7/8 for backend web development
- Entity Framework Core for ORM and SQL Server for relational database management
- Razor Pages, VUE JS, Tailwind Admin Panel
- Git, GitHub, and Azure Repos
- xUnit for Unit Texting
- SQL and SSMS

Kineti Minds Tech (Skyline), Qatar

Jan 2025-Present

Full Stack Developer | Remote Protocol Developer

I was working as Protocol Developer to develop the connector between physical device and cloud or any database. Also visualize and optimize the connector according to the requirements. Also work on low code app developments on CATA and Catalogs developments.

Platforms and Tools:

I was engaged with many programming languages & Tools for Protocol/Connector development.

- **Dataminer Cube**
- **XML and C#**
- **Low Code Apps (CATA)**
- **Catalog Development**
- **Visualization via MS Visio**
- **Scripting and Automatization**

Huawei Technologies PVT LTD Islamabad, PAKISTAN

October 2021-December 2024

Quality Control Engineer | Remote Quality Controller and Approver

I was working as Quality Control Engineer at Huawei Digital Operation Department (DOC) to Control Quality of hardware installation and services such as BSS, Wireless, power and Fix Network.

Platforms and Tools:

I was engaged with many programming languages & frameworks for both frontend and backend development.

- **Rollout Plan Collaboration**
- **ISDP Smart QC**
- **Huawei Database (SIMspace)**
- **Projects Activity Dashboard**
- **EHS and E-Survey**
- **Templates Builder & Automatization**

Projects:

Below mentioned are some of different projects where I worked as Quality Control Engineer.

- **Saudi Zain Hajj Swap Project 2024**
- **Saudi ITC 5G Phase 2 Project 2021**
- **Saudi Zain Sophia 3 Project 2023**
- **Saudi Mobily Access Project 2024**
- **Saudi Mobily Next Project 2023**
- **Saudi Tawal STC Project 2023**
- **Saudi STC 5G Phase5 Project 2023**
- **Philippines DITO FTK Project - 2021&2022**
- **Globe Wireless Expansion 2021**

WEB-BUGGs Lahore, PAKISTAN

March 2021- September 2021

Full Stack Developer | Designing, Building and Deploying

I worked as full stack developer being using many programming languages, framework and tools to meet business and projects requirements.

Programming languages and Tools:

I was engaged with many programming languages & frameworks for both frontend and backend development.

- **PHP & JavaScript**
- **HTML, CSS, Bootstrap**
- **Ionic (Cross Platform APP builder)**
- **WordPress, Shopify and WooCommerce**
- **Visual Studio, GitHub**
- **SQL, NODE, Firebase**
